

# 5G Multi-Agent Planning — Final Report

This is a placeholder. The real report is generated by:

```
python agents/llm_report_agent.py
```

It synthesises results from outputs/agents\_summary.txt and the GeoPackages in results/ (final\_merged\_grid.gpkg, recommended\_sites\_v3.gpkg) into a multi-section PDF analysed by the local LLM (qwen3:8b via Ollama).
